

RUYI ZHONG (SHIRLEY)

Business Data/BI Analyst | Forecasting • Visualization • Actionable analysis result • Dashboards report | Data Automation

SUMMARY [Click here to see my professional portfolio](#)

Master's student in Data-Driven Business Development with experience in ERP systems, project coordination, and data analysis and reporting.

Skilled in structuring data, improving processes through automation, and translating complex information into clear, actionable insights.

Strong team collaborator with a focus on supporting reporting transparency, operational efficiency and strategic decision-making.

CURRENT STUDY

2025-2027

Syddansk Universitet

The programme focuses on transforming data into business value through data analysis, digital business strategy, and business development. I have developed solid competencies in Python, SQL, R Studio, and Power BI, and I am comfortable managing complex datasets, performing analyses, and generating insights to support business decisions.

In addition, I have gained an understanding of how traditional businesses can be transformed into more data-driven and digitalized organizations, combining technical knowledge with business-oriented thinking.

EXPERIENCE:

Sales Support

2025-NOW

9 UNITED - STUDIO 9

- Supported data analysis and reporting to enable business decision-making
- Coordinated across design, sales, and sourcing teams to ensure alignment and transparency
- Coordinate communication between the design, sales, sourcing, and B2B platform teams to ensure efficient collaboration and structure.

Global sales coordinator

2021-2024

EIVA A/S

- Coordinated 800+ global projects, ensuring structured execution across multiple stakeholders
- Supported reporting and data analysis to improve decision-making and operational efficiency
- Worked with ERP/CRM systems (SAP, Navision, Business Central) to manage data and optimize processes
- Improved internal workflows and communication between departments
- Delivered structured updates and insights to support business operations

Business specialist

2017-2018

SHANGHAI TRUE NORTH CONSULTING

- Performed data registration, financial reconciliation, and process optimization.
- Assisted with digitalization projects and implementation of new systems.

COURSE TRANSCRIPT

MSc in Economics and Business Administration — Data Driven Business Development
Syddansk Universitet, Denmark

Digital Business Strategies

12 / A

Description

Studied how digitalization, data, algorithms, AI, IoT, and big data reshape strategy, innovation, competition, business models, ecosystems, and organizational transformation. The course emphasized strategy as an iterative and case-based process in the digital age.

Key skills

- Digital strategy, business models, digital transformation, AI, big data, case analysis

Data Science for Business Development

10 / B

Description

Applied databases, data extraction, data analysis, machine learning, and data visualization to business development problems. The course focused on the full business data lifecycle and how analytical results can be communicated through visualization tools.

Key skills

- SQL, databases, data modelling, machine learning, Power BI, business analytics

Data Programming

12 / A

Description

Developed Python-based data analysis workflows, including data modelling, gathering, cleaning, processing, and visualization.

Key skills

- Python, data cleaning, data processing, basic visualization, Streamlit, interactive result pages

Methodologies for Business Research

10 / B

Description

Designed and evaluated empirical business studies using qualitative and quantitative research methods. The course covered research design, data collection, scientific quality criteria, qualitative interpretation, quantitative analysis, mediation, moderation, and reporting of findings.

Key skills

- Research design, qualitative analysis, quantitative analysis, mediation, moderation, R/statistics

Organizing and Scaling Digital Business

12 / A

Description

Explored how firms organize, lead, and scale digital businesses by aligning structure, processes, rewards, people, culture, and leadership with emerging digital technologies and data-driven business strategies.

Key skills

- Organizational design, digital scaling, leadership, culture, transformation alignment

Idea and Opportunity Development

12 / A

Description

Developed entrepreneurial opportunities through data-supported problem identification, idea generation, evaluation, prototyping, Lean Startup testing, Business Model Canvas, effectuation, and scaling under uncertainty.

Key skills

- Entrepreneurship, opportunity development, MVP testing, Lean Startup, BMC, prototyping

Data Analytics in Accounting

12 / A

Description

Applied data analytics to accounting problems and reflected on how technology changes auditing, financial accounting, and management accounting. The course involved Excel, SQL, Power BI, ETL, visualization, and communication of data-driven accounting insights.

Key skills

- Excel, SQL, Power BI, ETL, forecasting, accounting analytics, dashboard communication

RUYI ZHONG (SHIRLEY)

Datadrevet forretningsudvikling

OM MIG [Click here to see my professional portfolio](#)

Kandidatstuderende i Data-Driven Business Development med erfaring inden for ERP-systemer, projektkoordinering samt dataanalyse og rapportering.

Kompetent i at strukturere data, forbedre processer gennem automatisering og omsætte kompleks information til klare og handlingsorienterede indsigter.

Stærk teamspiller med fokus på at understøtte gennemslagskraft i rapportering, operationel effektivitet og strategisk beslutningstagning.

NUVÆRENDE UDDANNELSE 2025-2027

Syddansk Universitet
Uddannelsen fokuserer på at omsætte data til forretningsværdi gennem dataanalyse, digital forretningsstrategi og forretningsudvikling. Jeg har opbygget solide kompetencer i Python, SQL, R Studio og Power BI, og jeg er komfortabel med at håndtere komplekse datasæt, udføre analyser samt generere indsigter, der understøtter forretningsbeslutninger. Derudover har jeg opnået en forståelse for, hvordan traditionelle virksomheder kan transformeres til mere datadrevne og digitaliserede organisationer ved at kombinere teknisk viden med forretningsorienteret tænkning.

ERFARINGER:

Salgsstøtte 2025-NOW

9 UNITED - STUDIO 9

- Understøttede dataanalyse og rapportering for at muliggøre forretningsbeslutninger.
- Koordinerede på tværs af design-, salgs- og sourcingteams for at sikre alignment og gennemslagskraft.
- Koordinerede kommunikation mellem design-, salgs-, sourcing- og B2B-platformsteams for at sikre effektivt samarbejde og struktur.

Global salgskoordinator 2021-2024

EIVA A/S

- Koordinerede over 800 globale projekter og sikrede struktureret eksekvering på tværs af flere interessenter.
- Understøttede rapportering og dataanalyse for at forbedre beslutningstagning og operationel effektivitet.
- Arbejdede med ERP-/CRM-systemer (SAP, Navision, Business Central) for at håndtere data og optimere processer.
- Forbedrede interne arbejdsgange og kommunikation mellem afdelinger.
- Leverede strukturerede opdateringer og indsigter til understøttelse af forretningsdrift.

Forretningspecialist 2017-2018

SHANGHAI TRUE NORTH CONSULTING

- Udførte dataregistrering, finansiel afstemning og procesoptimering.
- Assisterede med digitaliseringsprojekter og implementering af nye systemer.
